

SKEDit: Auto Message Scheduler

About SKEDit

SKEDit is a mobile application that automates the scheduling of messages, status updates, and setting up of auto-replies across various digital communication platforms, including WhatsApp, Telegram, and Messenger. It serves as an essential tool for businesses, enhancing communication efficiency and effectiveness. SKEDit is a leader in digital messaging solutions boasting over 4 million downloads and 145,000 active monthly users, evidencing our significant market presence and impact. Operating on a freemium model, SKEDit offers flexible subscription options, enabling users to select from monthly or yearly plans that best meet their needs.
